INNOAESTHETICS

INNOAESTHETICS' extensive product range provides aesthetic professionals and dermatologists with highly effective solutions to improve skin health and treat beauty-related concerns and skin disorders. The laboratory also develops premium skincare products for end-users that can complement a professional treatment or be used alone.

We develop and manufacture our products in our pharmaceutical plant in Barcelona, using the latest scientific advances and the most innovative active ingredients that work in synergy to achieve outstanding and long-lasting results. Clinical trials support the efficacy and safety of all our products.

To get the best out of our products and promote excellence in clinical practice, the company offers through **the Skin Academy** tailored training programs that provide advanced scientific knowledge and technical skills.
